### PROFILE

Pre-final year computer science student, pursuing Bachelors degree at Vellore Institute of Information Technology, Vellore.

I am currently learning Web dev using React. A responsible and ambitious student willing to use my technical and organizational skills in respective fields of work and learn more about technology.

### PROJECTS

#### AudiChat | Real-time Chatapp

- AudiChat is a real-time chat application that allows users to seamlessly communicate with each other. It provides a user-friendly interface for chatting, sharing images and videos.
- Link - <https://audi-chat.netlify.app/>

#### Bake n Flake | Product Website

- Front end website for a homemade bakery. UI/UX designed from scratch and all resources made inhouse using photoshop
- Link - <https://bnf-audichyaishan.netlify.app/>

#### GitHub Buddy Glimpse

- GitHub Buddy Glimpse is a react project that allows you to easily view the entire GitHub profile of a user just by entering their username and provides an efficient way to display the user's repositories and basic information.
- Link - <https://githubbuddyglimpse.netlify.app/>

#### 3JS Personal Portfolio

- Personal portfolio with realtime rendered 3d models using 3Js and react. All the 3d models are interactive and responsive
- Link - <https://ishanaudichya.netlify.app/>

#### JukeFi | Lofi Music Player

- JukeFi is a web-based music player designed specifically for playing soothing lofi songs. It provides a seamless and user-friendly experience for enjoying your favorite lofi tracks right in your browser.
- Link - <https://jukefi-audichyaishan.netlify.app/>
